City Grey Paved Footpaths

Footpath and Kerb Cross-Section

Reviewed: 07/05/2019

General Notes:

1. The city grey paving used in footpaths, squares, medians and cross-overs etc. is an exposed aggregate concrete paving slab. Standard sizes supplied by Urbanstone are:
   1.1. 400x400x60mm, used for footpaths and pedestrian areas.
   1.2. 300x200x70mm, used for cross-overs and trafficable areas.
2. Leave joints of 3-4mm between the slabs and fill with ‘Pavelock’ sand or similar approved.
3. Provide expansion joints at the back of kerbs and at every 6 metres.
4. All expansion joints shall be 75mm x 12mm ‘Abellflex’ or similar approved.
5. Concrete pavers should be a minimum of 28 days old, prior to laying.
6. 150mm minimum of compacted limestone, waterbound and placed on a compacted sub-grade, should be provided as base to all footpaths.
