Standard Kerb Types and Installation Details
Granite Radius Kerbs

General Note:

1. These standard pieces are to be used for square and splayed parking bays. For more information on parking bays in areas with granite kerbs refer Design & Construction Notes: Book 300 - Standard Footpath Design and Installation Details.
2. Other standard granite kerb radii (2m, 3m, 5m, 6m, 7m, 9m, 10m & 20m) convex or concave are available. These are costed per linear metre and procured on a project by project basis.
